THE REDCLIFF REVIEW, THURSDAY, OCT. 2nd, 1930

Number 29

## Harvest Vale U. F. A. Local Asks Removal of East Area Com.

Dissatisfied With Way They are Handling Problems of Farmers and Ranchers of the District—Many Complaints Registered.

Judging from opinions expressed at a regular meeting of the Harvest Vale U. F. A. local held here last Saturday evening, there is great dissatisfaction among farmers and ranchers of this district over the manner in which the Tilley East Area Commission is attempting to solve the problems of the district.

After President H. Deane had explained that the main object of the meeting which was to consider complaints about the way leases had been contracted in the district, almost every one present had some complaint to register. Among these were:

1. That leases had been taken away from men who had previously held them and paid for them for years and given to some else without consulting the present lessee and that this practice worked to the inconvenience handicap and unfairness of the original lessee.

2. That leases were given out without due consideration being given to water rights. This resulted in some favored ones controlling all watering places and fencing them off from others who were left without any water, and the balance of land for lease was no good to any one.

3. That the commission had developed into dictators who paid no attention to the wishes of the people concerned.

4. That in the opinion of the meeting open leases with a head tax for stock would be more equitable and satisfactory than the new system of leasing land to individuals and that all locals should circulate a petition asking for the head tax.

5. That so far as the commission is concerned they had done nothing far from start to finish.

After discussing these complaints the following resolutions were introduced and passed unanimously.

Moved by E. Reynen seconded by A. Larson.

That in the opinion of this meeting the present Tilley East Area Commission is not solving the problems of this district in a manner conducive to the best results nor the best interests of the residents of the district and whereas the commission has given no attention to the wishes of residents as expressed at several meetings called throughout the district for the discussion of these problems, but instead have laid down plans which will work a hardship on, and be most unfair to a large percentage of the farmers and ranchers of the district.

Therefore be it resolved that we request the legislature to disband the present commission and appoint a new commission consisting of one farmer, one rancher of the district who are familiar with conditions, and a third to be selected by the government. The resolution carried unanimously.

Hector Lang, M. L. A. for this constituency was present at the

## Is Redcliff To Have Window Glass Plant?

Albertan Says Eastern Co. To Locate Here.

In an editorial in the *Albertan* Tuesday it was announced that an eastern window glass company was contemplating building a branch factory in Redcliff. As the Dominion Glass Company is we understand, interested in the Eastern plant referred to, it is only natural to expect that if they contemplated building in the west, Redcliff would be the most likely place for them to locate as they already have big interests here.

The Review does not know what ground the *Albertan* has for this announcement but citizens of Redcliff will be pleased to learn that the *Albertan's* prophecy is correct.

## Money is Voted for Railway Construction

Prospects Good For Building of Hanna Branch.

The outlook for the completion of the Canadian National branch line into Redcliff is now more promising according to reports heard on all sides and according to latest news from Ottawa.

Yesterday's news from Ottawa states that out of the twenty million dollars voted for unemployment at the special one and a half million will be set aside to pay interest on, construction work of both Canadian railways which otherwise would have been delayed for four or five years.

As the completion of this branch line has now been delayed for several years and as C. N. R. officials have recently been paying considerable attention to conditions here and also to the condition of the grade already built, there appears to be good grounds for expecting that the completion of this branch is among the list of the proposed railway construction.

meeting and said glad to get the feelings of the meeting and would be glad to render any service he could in getting their grievances remedied.

W. C. Smith M. L. A. for Edmonton was unable to be present as he was in Edmonton trying to adjust some other complaints regarding the one-third crop adjustment with the government.

## Successful Anniversary of Gordon Memorial

Special Services Sunday and Supper Monday.

Members and adherents of Gordon Memorial Church commemorated another mile stone in the history of the church last Sunday and Monday. Why they celebrated another anniversary.

On Sunday special services were held morning and evening and at both services the choir rendered special music appropriate for the occasion. The pastor, Rev. R. Erskine Pow, occupied the pulpit in the morning and Rev. R. Willis Cann, of Medicine Hat, in the evening. Both gave very impressive addresses which made a profound impression on the congregation.

On Monday evening the Ladies Aid put on their annual supper and concert. Both were well patronized and in keeping with the reputation of the Aid for such events. The outstanding feature of the musical program were the Vocal selections by Mr. G. Marsh, the piano selections by Mr. Woodroff and the violin selections by Mr. Lauder. The failure of other artists to respond to their names was a great disappointment.

The principal feature of the evening was the address by Rev. George Dickson, of Calgary. Mr. Dickson's subject was "The Folk Next Door."

After drawing attention to the way in which modern inventions had overcome distance and the development of telephone, telegraph, cables, radio, Railroad Engines and fast Steamships, he stated that at present people living on the other side of the world were in reality the folk next door.

Since, therefore, we are on the earth for a little while we should make it our business to get acquainted with our neighbors not only in the community but in the world at large. In order to do this we must get rid of bad feelings and not allow our patriotism to lead us into the mistakes of magnifying our own good qualities by minimizing those of others. He thought the solution of world problems today could be reached by the spirit of mutual understanding and sympathy.

Mr. Dickson's address was liberally punctuated throughout with humorous stories and experiences.

## Local Bible Society Holds Annual Meeting

Elected Officers and Prepared for Annual Canvass.

The annual meeting of the local Bible Society was held in Gordon Memorial Church last Tuesday evening for the purpose of re-organizing for this year. The following officers were elected:

Hon. President—Wm. Henderson.  
President—Jas. Stratton.  
Vice Pres.—All the local clergy.  
Secy.—Mrs. Fred Cann.  
The list of collectors was left in the hands of the officers. The annual collection will be made made in the near future.

Rev. H. D. Mary, district Secretary of the Bible Society, was present and gave a splendid talk on the work of the society. He also wished to express the thank of the society to the people of Redcliff for their liberal contributions in the past and to the canvassers for their splendid work. Mr. Marr also congratulated the Redcliff branch for having as one of its members the oldest officer of the Bible Society in the British Empire in the person of Mr. Wm. Henderson.

## Margaret Pow Wins Drug Store Contest

Nita Waloff Second and Norma Waloff Third Prize

Everyone has been taking a keen interest in the guessing contest put on at the drug store during the month of September, guessing the number of ordinary field beans in the pint jar. The guesses ranged from 300 to 999 and one guess was put in as DC which was interpreted as the Roman Numeral for 600. The correct number of beans in the jar was 1593 and Miss Margaret Waloff was the number within four beans and won first prize with a guess of 1597. Miss Nita Waloff came second with a guess of 1598 and Miss Norma Waloff third with 1600. The three young mathematicians are delighted with their Black and white pen and pencil secured them for their guessing ability.

which made it most enjoyable instructive and uplifting.

On the whole the anniversary occasion was a great success.

## Danish Citizens Enjoy The Danish Program

At the Home of Mr. and Mrs. John Kitchen Friday.

Last Friday evening Mrs. J. Kitchen invited all the Danes in town to her home to hear the Danish concert that evening over the Radio.

The program which was put on to celebrate the birthday of the Danish King was thoroughly enjoyed by the guests, as most of the items were in Danish and the selections was one "King of Kings" rendered by a Danish Choir. Both the Danish consul and the Editor of the Danish Review gave short address.

After the program, refreshments were served and a most enjoyable social hour was spent.

Card of Thanks.  
We, the Danish residents of the town of Redcliff and district wish to extend our sincere thanks to Mr. and Mrs. John Kitchen for their kindness in inviting us to their home to hear the Danish program over their radio last Friday evening and for their splendid hospitality during the evening.

## Here and There

(617)  
One of the biggest game bass ever taken out of the Canadian Rockies has fallen to the gun of Angus Hodgson, of Montreal, who has been hunting in the Kootenai Valley. It includes two deer, two Rocky Mountain goats, one moose, one elk, and one black bear. At the end of his trip he spent six days tracking a moose—grizzly and a black bear. His grizzly would have had the limit of every animal available to get which the law allows him.

Capturing the largest one-day movement of supplies out of British Columbia this season, the Canadian Pacific Railway recently opened four special freight trains over the mountains, making a shipment of 117 carloads of Montreal furs to the Pacific Provinces and as far east as Kipona.

Rolling mounds across New Brunswick lakes and rivers is beginning to rate as the coming snow crisis. Major McClelland, editor of the York sport and magazine writer, who has been spending a Fall outing in the Miramichi and Calix's river districts. Up to the present the season ridden has been a snowless but Rev. Thomas Travis, of Moncton, N.J., appears to be the first who has ridden a full moon which was done in the Key Hole of the Lake, about 31 miles from Fredericton. Now other sportsmen are taking up the pastime until it begins to look as though sportsmen in New Brunswick will be getting the habit of crossing lakes and rivers on moonbeams.

Officials of the World's Great Exhibition and Conference to be held at Regina July 26 to August 6, 1931, report that visitors in the States of Missouri and Kansas are highly interested. Entries of both cattle and corn from these states are to be expected at the Exhibition. The 1930 prize is to be offered in cash prizes and in some classes as well as in prize prizes will be awarded. First prize for wheat will be \$2,000 and first prize for corn, \$1,000.

Flag poles are found at their best and highest in British Columbia. Recently one was sent via the Panama Canal all the way by water to the Toronto National Exhibition. It was 377 feet high, 51 inches in diameter at the base and 9 1/2 inches at the top. This young giant was 286 years old. The daddy of them all is at the famous New Gardens, London, England, and is 241 feet high.

This year's crop of grapes in the Niagara fruit peninsula between Hamilton and Niagara Falls, Ont., is expected to reach about 35,000,000 pounds, an increase of 15 per cent. over the 1929 crop.

Motor tourist travel from the United States to New Brunswick has been 50 per cent. greater this year than in 1929, according to statistics covering the season up to August 31, compiled by the provincial government from official records. The increase at the 15 ports of entry along the international boundary amounted to 55 per cent. Normal increase each year has been 25 per cent. and the great difference this year is attributed to wider advertising by the provincial government.

## Fire Destroys Gas Regulator House

Little Soverly Badly Burned by Explosion.

Shortly after noon last Friday an explosion occurred in the regulator house in connection with one of the gas wells on the Dominion Gas Co. property.

It is not known exactly how the explosion happened but there was evidently some gas escaping from one of the pipes and in some way became ignited. After the explosion the small building burst into flames which enveloped the building before the brigade arrived. It was soon under control and as soon as the debris was cleared away it was found that the equipment inside was not damaged to any great extent. The damage was soon repaired and the gas well in operation again.

The time of the explosion S. Soverly was in the well doing some repair work. The concussion blew him out the door and he was badly burned about the face and hands. He was rushed to the hospital by car and has been confined there ever since. Although still suffering considerable pain he is progressing as well as possible.

Jas. Norie, of Medicine Hat was an interesting visitor in town yesterday. Although a resident of the Hat for a number of years he had never visited the gas plant here. Needless to say an inspection of this busy industry was a revelation to him. He had no idea of the magnitude of the plant and when he saw beer bottles being manufactured at the rate of 600 minute he concluded there was no use of any man trying to drink Alberta dry.

Everybody welcome. A special invitation is extended to those who have no church home or do not attend any Sunday School.

## Old Dug-Out Rests From World Cruise

The old "Tillamook", battered and storm-torn, but still gallant under its new coat of paint, was brought from a marine graveyard on the banks of the Thames, London, recently, and placed on public inspection in front of the famous Crystal Palace, Victoria, B.C., where it is becoming one of the sights of the British Columbia capital. The old dug-out canoe was built by Indians near Victoria more than 120 years ago and a century later carried Captain J. C. Voss and Dr. R. L. Linton, Royal newspaperman, on a round-the-world trip in 1901 of 40,000 miles, weathering typhoons in the Pacific and hurricanes in the Atlantic. The canoe was brought to Victoria through the efforts of George J. Warren, commissioner, and other officials of the Victoria and Vancouver Island Public Bureau. Picture shows a view of the old dug-out.

**Planning, Saving, Investing**

"To have AND to hold" when applied to money, does not seem to be an easy lesson for most people to learn. The word "and" is stressed because during the recent stock market slump there have been millions who have failed to do the "holding." They have emerged as losers. They have allowed the lure of speculation to divert their time and attention from their regular occupations and interests to a field of activity about which they knew next to nothing. So it seems that most of us need to concentrate more on the "holding" part of our financial plan.

So writes Leroy D. Peavey, president of the well known Babson's Statistical Organization, who, from an income-producing point of view divides the average individual's life into roughly three parts. The first, from about age twenty to age thirty, might be called the period of preparation or getting settled. The second, from thirty to the late fifties, is the period of accumulation. The third, from the late fifties on, is the age of retirement or at least of lessened earning power.

No matter how much time and money may be expended during the teens and twenties in preparing young people for their life work, they can never, say Mr. Peavey, be independent during the last period of life unless they have made good use of those twenty-five or more golden years in the second period. It is during this period of accumulation that one's surplus must be built up and judiciously invested if one hopes to be independent the rest of his days. His watchwords should be Plan, Save and Invest.

Planning means the making and using of a budget. The budget is the blue-print of your financial structure. Fit it to your own situation and then stick to it, instead of shying it after a couple of trials. Or what good are blue prints if the structure does not grow up in accordance with their specifications? And one of these specifications will be the proportion—whatever it may be—of your income that is to be set aside as savings. Another specification will be the determination to have of your own money some day—one that eventually will be free and clear. Because it is free of mortgages or other claims, it will stand between your family and distress. Life insurance and other sound investments should likewise be included.

The second watchword, "Saving," has been brought to the consciousness of the people of this generation by many years of educational effort. It has been adopted by hundreds of thousands of Canadians as evidenced by savings accounts in post offices and banks. It was given a great impetus during the war when, through the urge of patriotism and in response to the call to sacrifice to "win the war," thousands of people who never before had invested in a bond bought Victory Bonds, and thus learned the lesson of how easy it is for money to accumulate and multiply itself through interest payments. But the lesson of saving is one that must be taught to each successive generation, and there should be no slackening in the effort. It is a lesson that all parents should see their children learn early in life and continually practice, until the savings habit is formed.

When it comes to "Investing," you have the choice between invoking the almost unbelievable power of compound interest when harnessed to regular monthly savings, or, on the other hand, putting the money into well seasoned securities. In the first case you need not particular advice, for in their operation compound interest is both tireless and automatic. In the second instance, that is, with investment securities, you need advice of the most discriminating sort. This fortunately, you can easily obtain from your own banker.

You will want to have among your investments some good sound bonds anyway, and then if your available funds permit, some of the best stocks. The latter should be bought outright and never on a shorting margin. Remember this too. It is wise to keep a part of your funds in liquid form,—that is, in cash or in such short-term securities as can quickly be converted into cash. Then you will be prepared for emergencies. You might need this money for a personal emergency, or for some special investment bargain in the market that had come to your attention.

The point is to put each spare dollar to work, twenty-four hours a day and each day in the year, earning more income for you. Your ability to "spare" these dollars for such a proposition will lead to a surprising increase in your "earning" power; that is, your ability to save. You will be able to see with your own eyes the rising structure of financial independence that is going to stand you in such good stead later in life. But in order that your future income may be ready when you need it, start to build that income NOW.

The word "investment" should be broadly interpreted to include not only bank accounts and other financial policies, your own home, real estate, mortgages, and other forms of capital. Life insurance is indeed important. It not only helps people to save, but it is a protection as well as an investment. Every one should carry life insurance, but, on the other hand, it is not the part of wisdom to place all your savings in life insurance. Follow instead the practice of diversifying your investments—part in a savings account, part in life insurance, and part in sound securities.

However, this advice about investing is almost valueless if it is to be only a temporary effort, or if you allow your investments to be frittered away through carelessness or the greed for more. Rather turn to the fundamental sources of savings income.

And, above all, turn to hard work, initiative and perseverance, as the right means of accumulating sufficient funds for your needs, rather than the purely speculative stock market, which is a perilous path for nothing. Lastly, carry out the principle that "godliness with contentment is great gain," in your finances as well as in the rest of your life.

### Huge Power Projects

Millions To Be Spent in Next Three Years on Hydro Development

More than \$100,000,000 will be spent in each of the next three years on power projects now under development in Canada. Although there are other plans for important building projects, none will have a more intimate bearing upon the industrial development of Canada than those now contemplated by the power industry. The present turbine installation in the Dominion averages 583 horsepower per thousand of population, a figure which places Canada, among the leading countries of the world in per capita utilization of water-power. The total installation now amounts to over 5,700,000 horsepower and an additional installation of over 3,000,000 horsepower will probably be made within the next five years. Quebec has the largest installation with an average of nearly one horsepower per person. Ontario has a total installation of nearly two million horse-power, and in 1929, the power companies in that province generated over six billion kilowatt hours, or more than one-third of the total produced in the Dominion. Manitoba has an installation of 300,000 horse-power, and Alberta, 70,000 horse-power. On the Pacific coast, large resources are available and turbines with a capacity of 560,000 horse-power have been installed in British Columbia.

### Is Baby Teething?

Teething time is a time of worry to most mothers. The nervous, fretful, feverish, little gums are swollen and sore; diarrhoea, convulsions are feared. The little convulsions set in—neither baby nor mother can sleep.

These troubles can be quickly banished, however, through the use of Baby's Own Tablets containing Mrs. Louis Grubb, Tinseltown, Ontario, who has used 75 tablets for all my babies while teething and has found them a splendid medicine."

Baby's Own Tablets are sold by all medicine dealers. Each bottle costs 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

### Russian Laws On Religion

Teaching Of Religion In Schools Is a Punishable Offence

Extracts from the Russian laws on religion, compiled by the British Embassy at Moscow, were issued in an official government "white paper." The laws, which were passed by the Duma, provide for the punishment of a promise given to the Conservatives by the Labor Government last year, when groups in Great Britain and other nations were protesting against alleged religious persecution in Russia.

The "white paper" cites a provision of the Soviet constitution providing for the separation of church and state, and of schools from religion, while equally guaranteeing liberty of religious belief and freedom of anti-religious propaganda.

It also quotes a provision of the criminal code which says that teaching of religion before school children is punishable by a year of compulsory labor.

Protect the child from the ravages of worms by using Mother's Great Worm Extirminator. It is a standard remedy, and years of use have enhanced its reputation.

### B.C. Hydro Development

Possibility of developing 3,000,000 horse-power from rivers along the coast district of British Columbia is disclosed by engineers.

### First Transcontinental Levels

The first Canadian transcontinental line of precise levels was completed by the Geodetic Survey of Canada in 1916.

### TWICE BENEFITED BY SAME REMEDY

**Recommends Lydia E. Pinkham's Vegetable Compound**

**Cobourg, Ontario.** "I was once when I had a sick father and a nursing baby to care for. I got all run down and took Lydia E. Pinkham's Vegetable Compound to get strength to do my work. Another time I had a severe headache and did not sleep all the time. Took Lydia E. Pinkham's Vegetable Compound and felt like a new woman. I recommend it to any woman who is in the age when she needs building up."

—Mrs. T. E. SHAWMAN, R.H. 4, Cobourg, Ontario.

### Good News For Students

Would Curtail Homework and Examinations For Vancouver High Schools

Curtailment of home work and abolition of examinations for Vancouver high schools is being considered by educationalists here this summer with a view to lightening school work for children and, at the same time, increase the efficiency of study.

With the inauguration of the new four year high school matriculation course at the commencement of the fall term, some of the principals of several high schools, in a statement against home work which has been averaging the country in the past few weeks is steadily increasing, both among parents and teachers who declare that the old fashioned idea of giving children homework to keep them out of mischief is not raising the standard of education. With science investigating every branch of life for the purpose of simplifying living conditions, education, it is claimed, has stood almost still in spite of the efforts of psychology experts.

### Recipes For This Week

(By Betty Barclay)

#### GINGER BREAD

2 cups sugar.  
1 cup butter.  
1 cup molasses.  
4 eggs.  
1½ cups flour.  
1½ tablespoons soda.  
1 tablespoon ginger.  
1 tablespoon cinnamon.  
2 cups sour milk.  
1 teaspoon salt.

Cream butter and sugar; add well beaten eggs and molasses; mix ingredients together and add alternately with milk. Bake in layer cake pans for 35 minutes in slow oven or about 325 degrees Fahrenheit. Cut in squares and serve with whipped cream.

#### ORANGE CARAMEL

6 oranges.  
½ cup water.  
½ cup cream.  
1 pinch nut.

Pare oranges, removing membranes with peeler and cut crosswise, in slices. Put sugar and water in a small saucepan, and boil quickly until syrup is a golden brown. Arrange layer of orange slices in glass dish; sprinkle with sugar; pour over enough of the syrup to form thin coating over the orange; add another layer of orange and syrup; repeat until oranges are used. Bake in hot stiff, pale lightly on the orange, and sprinkle with chopped pistachio nuts.

Many infants are infected by worms which cause great suffering and discomfort. The most common cause constitutional weakness, diarrhoea, and worms. Miller's Worm Powders will remove the worms and restore the system; there will be no recurrence of the trouble. And not only this, but the medicine is entirely harmless to the organs that worms cause and restore them to soundness.

### Military Promotion

Western Officers Appointed To Command Of Regina and Calgary Regiments

Promotion of Major E. R. Knight to the rank of Lieutenant-Colonel, and to command the Calgary, Alberta, regiment, was announced recently at the Department of National Defence. It was also made known Lieut.-Col. J. McArthur was appointed to command of the Third Reserve Battalion of the Regina Rifles Regiment.

Both officers have had long service in the Canadian Militia. Lieut.-Col. Knight preceded to England with the 58th Battalion, C.E.F., in March, 1916. He served in France and Belgium. Lieut.-Col. McArthur went overseas with the 58th Battalion, in May of 1915. His service also was in France and Belgium.

### Pioneer Mountie Dies

Peter O'Hare, 77, pioneer mountie policeman of the west, died recently at Maple Creek. Since the earliest days of the police in Saskatchewan Mr. O'Hare was associated with the Mounties, taking part in the Riel rebellion campaign. His service extended over 40 years.

### Cruel Oil Consumption

At present only about 3½ per cent of our crude oil consumption is produced in the Dominion.

Trans-Atlantic telephone service has been extended in Sweden, so that it is possible to talk to people within the Arctic Circle.

Minard's Lintment removes Warts, relieves Bunions.

**ENO'S FRUIT SALT**

**Doctors Warn Against Drastic Purgatives**

Physicians know the danger of using cheap cathartics that create a harsh, unnatural intestinal activity. They know that ENO'S "Fruit Salt" is a more than a laxative. It is a delicious health beverage that sweetens and tones up the entire system—and that it is daily use—just a dash in a glass of water, every morning—is an aid to vigorous good health.

### Report On Gas Fields

Member Of Geological Survey Of Canada To Make Report On Saskatchewan

Dr. G. S. Hume, of the Geological Survey of Canada, will make an immediate survey from all available data, of the prospects of finding gas in Saskatchewan, in suitable quantities within the province.

He will make any actual investigation in the field at the present time, but having visited each city interested in gas development and gathered material from other sources will make a report based on geological information already obtained by various survey parties.

This report, framed as it affects the various cities interested, will be submitted to the Dominion Government, which in turn will forward it to the provincial government. The joint committee, representative of four cities of Saskatchewan interested in the gas question, will then be put in possession of all the facts obtained.

This was the outcome of a conference held at the parliament buildings, at Regina, when Dr. Hume met five members of the Saskatchewan Government and also of the four-city gas committee.

Soft corns and warts are ugly, painful and irritating. Remove them quickly and surely with Douglas's Egyptian Lintment.

### Encourage Sheep Industry

Economic Survey Of Sheep Ranches Of Western Provinces To Be Undertaken

An economic survey of sheep ranching in Saskatchewan, Alberta and British Columbia is being undertaken by the Dominion Department of Agriculture, under the direction of the agricultural economist here, in co-operation with the Dominion Experimental Farms. This is the beginning of a programme of research work in agricultural economics on behalf of the livestock industry.

The Yungas Railway, of Bolivia, is erecting steel telegraph poles.

### No Cause For Alarm

Says Russia Will Not Be Factor In Wheat Exportation For Some Time

Thomas D. Campbell, of Hardin, Mont., who has been called "the world's largest wheat grower," returned recently from a trip to Russia as an agricultural consultant to the Soviet, and announced that it would be longer than alarmists thought before Russia was a factor in any export field.

As the country's five-year program progresses, he said, the needs of the country also increase. The more she grows the more she consumes. It will be at least three years before the Soviet government is a factor in the export of grain or any other commodity. Very soon the internal needs of the country will call for 1,000,000 bushels of wheat annually, just as an example.

**A Corrector Of Pulmonary Troubles.**—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experienced and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allow inflammation in the bronchial tubes.

Homey has become so popular in the British Isles that while 1,100 tons were produced there in the last 12 months, fully 3,500 tons, valued at \$2,000,000, were imported.

The United States exported 25,707,854 sets of false teeth last year.

### The Handy Bottle

Minard's is the sure relief in the Handy Bottle. For strains, burns, bruises, boils and blisters.

**MINARD'S "KING OF PAIN" LINIMENT**

The Yungas Railway, of Bolivia, is erecting steel telegraph poles.

## Plan For Wholesale Emigration From Britain As Solution Of The Unemployment Problem

Wholesale emigration under the direction of public utilities, which would be given special concessions for buying or leasing large tracts of vacant land which would be developed with the aid of the British and Dominion governments, is Labor's newest scheme for a solution of the unemployment problem which is costing Great Britain \$700 per minute.

Horace Greeley's "go west, young man," would become "go east or west" for the plan embraces all parts of the Empire. The idea will be brought up at the forthcoming Imperial Conference, in London, England, with the hope that the Dominions will approve the scheme and agree to a partnership with the Labor Government in finding work for the more than 2,000,000 persons unable to find work in Britain.

The plan is a new approach on the government felt that the old system of homesteads and other piecemeal movements of people were wholly ineffective under modern conditions and that the Dominions were also opposed to it, and that they would only swell the ranks of the unemployed in Britain, where they were unemployed.

The scheme is therefore a pretensions plan to find a place for those at present unemployed and not wanted. The utilities would be given co-operation in acquiring land and the development of virgin territories would be left in their hands. The British and Dominion governments, would aid in carrying out a comprehensive plan to settle the new territory and emigrants would be furnished as man power for the markets needed to establish a new economic frontier.

The government is pushing the project for a new type of job and the unemployment problem of the even claim the idea is a solution of the Dominion as well as the British territory will be open to the workers there as well as England. It also claims that thousands are willing to leave immediately, but the uncertainty of unemployment holds them in England for their life.

It is understood that one Dominion has already endorsed the scheme. There is no anticipation of British or among the proponents trouble in finding investors in the event the plan is adopted.

### To Relieve Unemployed

Nearly 12,000 Extra Men Engaged by C.P.R. On Improvements From Coast To Coast

Nearly 12,000 extra men are finding employment this summer in the Canadian Pacific Railway's programme of construction, maintenance and improvement, from coast to coast. Construction work of all kinds is being done both directly by the company and also by contractors, the company itself employing nearly 10,000 men in "extra gangs" throughout its system. The varied programme includes the laying of new tracks, repairing and renovation of right-of-way, bridges, tunnels, stations, and other buildings. The men, in general, are recruited as near as possible to the scene of work and kept steadily employed until each job is finished.

### Increase Wheat Duty

An increase in duty on wheat imported into Italy put into effect recently in order to safeguard the farmers of the country from unprofitable prices has been reported by A. B. Maddison, Canadian trade commissioner, in Milan, to the Department of Trade and Commerce. There is an official estimate of loss of about 1,000,000 tons of wheat in this year's harvest.

A motion picture screen which permits showing pictures outdoors and in lighted halls has been invented by two French engineers.

"I have lost my biggest creditor." "Is he dead?" "No, there was no help but to pay him." —W. H. H. Madrid.

—W. N. N. 1852

### Saskatchewan Egg Pool

Higher Prices Obtained This Season Over That Of Last Year

An increase in prices over those paid for the same period of 1929, is noted in the final payment of the Saskatchewan Co-operative Poultry Producers Limited, or Egg Pool. It is claimed that these prices (extra 22 cents; first 10 cents; second 17 cents and crack 15 cents, net cash, f.o.b. shipping point on freight shipments), are not only higher than at the same time last year, but are from one to two cents per dozen higher than those paid by any other commercial dealers in the province. The volume of business handled by the Pool has again increased by 14 per cent, following last year's gain of 58 per cent, over that of 1928.

**Ayrshire Breeders' Association**

Ninety-Five Reports Of Cows That Qualified For R.O.P. Standing

During June and July, the secretary of the Canadian Ayrshire Breeders' Association received 95 reports of cows and heifers that had qualified in the R.O.P. — 33 in the 305 day class, and 62 in the Honor Roll or 305 day division. In the former, 13 qualified in the mature class; 4 in the first-year-old; 5 in the three-year-old; and 9 in the two-year-old class. Twenty-seven of these records were made on the milkings a day.

(By Anabella Worthington.)

Interpretor Knows His Job

One of the busiest men in London this summer is W. Brotherton, interpreter for a bus company, who directs people in their own language. Besides English, his own tongue, he speaks German, French, Italian, Danish, Swedish and Japanese. "I can even talk American," he said, "which is just as well for any number of Americans seem to think they need an interpreter in London."

2551

Unique wrapped skirt treatment distinguishes this model of navy blue crepe silk.

The hips are snugly fitted. The waist is normal, which is generally becoming.

The surplus bodice is rolled into revers that show smart facing in white crepe silk.

It's an exclusive type of slandering-line skirt that is charmingly economical.

Style No. 2551 can be had in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34 and 36 inches bust.

It is lovely in black and white chiffon, printed voile with white trim, hyacinth blue chiffon, lime green cotton printed crepe silk and superlustrous blue crepe de chine.

Pattern price 35 cents. Be sure to fill in size of pattern. Address Pattern Department.

### "OIL BILL"

One of the outstanding features of the sea ice met at Penzance Beach, Puelich Lake, recently, was the driving of a William Marriott, of Hespeler, Ont., who not only won the local race in three straight heats from younger men, but stepped on up into the open competition of Class "C" and finished fifth in a good field of high-class experienced drivers. Up and around Puelich Lake Ald. Marriott is affectionately known as "Oil Bill." He drives a real racing sea boat, and is not only a superb rough water driver, but he knows the bays and is not afraid to plow right into the turmoil of a big field. His work at the starts drew cheers every time he came up to the flag.

### Canada Holding Trade Position

**Domination Maintains Place Among Leading Trading Countries Of The World**

Ottawa, Ont.—Canada maintained her position among the leading trading countries of the world in the fiscal year ending March 31, 1930, despite a sharp decline in export trade and a slight falling off in import trade. This is disclosed in the condensed preliminary report on the trade of Canada, 1930, issued recently by the Dominion Bureau of Statistics.

The year was marked by an unfavorable balance of trade of \$10,335,312, 512 compared with a favorable balance the year before of \$123,216,984. This was attributed to the falling off in the export of grain, particularly wheat, to the United Kingdom and continental Europe. Due partly to lower yields.

Canada's total trade in the fiscal year was \$2,393,212,000 compared with the total of \$2,654,375,000 in 1929, and \$2,359,555,000 in 1928. It is thus seen that while trade last year showed a falling off in comparison with the year before, it was still in excess of the total in the year ending March 31, 1928.

Imports last year amounted to \$1,248,273,582, compared with \$1,205,679,000 the previous year. The sharp decline in exports is indicated by the total figure of \$1,144,938,070, compared with the 1929 figure of \$1,348,695,070. The decrease in exports was \$243,056,005, and the decrease in imports was \$174,053,031, 17.6 per cent. for exports, and 12.4 per cent. for imports.

In export trade Canada leads the world in the export of printing, paper, nickel, and asbestos; occupies second place in exports of automobiles, wheat, and wheat flour, and fourth place in exports of wood pulp as well as a very high place in the world's exports of such staple products as lumber, fish, copper, raw fur, whiskey, meats, rubber tires, farm implements and raw gold.

**Interpretor Knows His Job**

One of the busiest men in London this summer is W. Brotherton, interpreter for a bus company, who directs people in their own language. Besides English, his own tongue, he speaks German, French, Italian, Danish, Swedish and Japanese. "I can even talk American," he said, "which is just as well for any number of Americans seem to think they need an interpreter in London."

**Put On Publicity Program**

In a further effort to bring before the people of the province the great variety of the produce of farm and factory, the Made-in-Manitoba Campaign, the Industrial Extension Bureau, is staging an extensive publicity programme.

**PRINCE OPENS NEW WORKSHOP**

Sidewalk cafes have been introduced in Havana.

## Valuable Resources Going To Waste As Vast Quantities Of Natural Gas Are Burned In Air

### Free Correspondence Courses

**Educational Opportunity For Every Boy and Girl in Saskatchewan**

Educational opportunity for every boy and girl in Saskatchewan is the ideal towards the attainment of which the provincial Department of Education is steadily working. Notwithstanding the rapidly growing volume of secondary education in high schools, collegiate institutes and in elementary schools, these schools do not meet the situation fully. To supplement the work thus being done, provisions have been made by means of correspondence classes, to give a course of instruction in several hundred boys and girls who, for various reasons, have been unable to attend the regular elementary schools. The next step is the inauguration of correspondence instruction in high school courses. These courses are for the benefit of pupils who have no high school facilities, or who have such physical disability as would prevent their walking to school.

### Farm Boys and Girls

**Canadian Juvenile Club Work Is Outstanding Among The Nations Of The World**

"Canada stands second only to the United States in all the world, in the work she is doing for her farm boys and girls. Our juvenile club work is outstanding among the nations," declared P. W. Walsh, superintendent of agriculture for the Canadian National Railways, who has just returned from England, where he attended the royal agricultural show at Manchester, and saw each in charge of the Canadian boys' cattle judging team which participated in the international judging contest in July.

During his trip, Mr. Walsh also attended the world's poultry congress at the Canadian delegates, and made a special trip to the continent to study phases of agricultural development there.

### Summerfallow Tests

**Found To Be No Advantage In Plowing Deeper Than Four Inches**

How deep should summerfallow be plowed? The answer to this important question in respect to prairie farming is provided by the Dominion Experimental Station, at Scott, Sask., where, after fourteen years of careful investigation, it has been found that there is no advantage in plowing summerfallow deeper than four inches, where a good job can be done at this depth. Not only is this sufficient to conserve the proper retention of moisture, but a considerable saving in time and labor is possible, and it assists the work of cultivation for weed control. Plowing at depths ranging from three to eight inches has been followed throughout the period of the test.

### Poultry For Profit

**Importance of Carefully Culling Flocks Before the Laying Season**

The ten-year average of the cost of feeding laying hens at the Lennoxville Experimental Station, of the Dominion Department of Agriculture, is \$24.35 per hen. This means that with eggs selling at an average of 35 cents per dozen, it takes 675 dozen, or 81 eggs, to pay for the keep of the laying hen—only the eggs laid in excess of that number can count as a profit. This demonstrates the importance of carefully culling poultry flocks before the laying season begins. The hens that lay from 150 to 200 eggs a year that pay.

### Good Road Making Material

**Met With Success In Extraction Of Tar From Sands In Northern Alberta**

Success in the extraction of tar from bituminous sands in the McMurray area of Northern Alberta is being achieved by the pure tar effort on the part of D. K. A. Clark, of the University of Alberta. It is reported that 95 per cent. pure tar was taken from the sands in recent experiments and it is believed that thousands of dollars may be saved in road-building and other developments as a result of the availability of this material.

**First Pienicker — "Isn't this an ideal spot for a picnic dinner?"**

**DMU — "It must be. Fifty million insects can't be wrong."**

**All airports in the United Kingdom now are government controlled.**

Suppose by some accident, all the coal mines of Alberta should suddenly be put on fire, and before the fire were extinguished, a full year's output of Alberta coal should be destroyed. And suppose, while the fire was going on, that the government took no steps to prevent this gigantic loss. What an outcry would there be from across the ocean in England against such a national scandal. Yet, in another form, that is exactly what is taking place day by day.

Natural gas, more efficient for heating than coal, is being burned in the air in Turner Valley annually at a rate nearly equal to the entire Alberta production of coal in 1927.

In 1927, Alberta produced a total of 6,034,164 tons of coal. In 1929, Alberta burned in the air in Turner Valley, 109,500 millions of cubic feet of natural gas, equivalent in heating value to 10,000 tons of coal.

In 1929, Alberta coal production increased to 7,335,489 tons of coal. But, at the rate now being burned in Turner Valley, the natural gas which will be burned as waste there in the coming year, will exceed Alberta's base coal production. These are not fanciful calculations. They are careful estimates, made conservatively by the gas and heating engineers. Enough natural gas would be waste in Turner Valley between January 1, 1929, and August 1, 1930, to supply the needs of present Alberta users for 15 years.

Among the Canadian National Railways, who have just returned from England, where he attended the royal agricultural show at Manchester, and saw each in charge of the Canadian boys' cattle judging team which participated in the international judging contest in July.

During his trip, Mr. Walsh also attended the world's poultry congress at the Canadian delegates, and made a special trip to the continent to study phases of agricultural development there.

### Canada Grows Fine Tobacco

**Canadian Grown Tobacco Of Better Quality Than The Imported Type**

Canadian farmers, consequent upon research work done by the Dominion Department of Agriculture, are now producing practically all the fine tobacco required by Canadian manufacturers, observes Dr. E. E. Ashbald, 33, Director of Dominion Experimental Farms, who adds that the quality is better than that of the imported leaf.

"Do you know what to look out for when taking a swim?" "Of course I do — the policeman." —Humans, Hamburg.

## Causes Of Earthquake

Little Known Forces May Be Factors In Earth Disturbances

The "trigger" force that sets off earthquakes, like Italy's disaster, has been identified vaguely in scientific theories that place it all the way from gravitation coming from the outer space, to the earth's own depths. This trigger, the final force that kicks the whole into action, is still one of the most possible means of forecasting quakes.

Gravitational forces are agreed on as a basis of earthquake power. But the conditions that suggest the balance of rocks, or mountains or whole sections of earth's crust so that they stand like a house of cards ready to be tumbled down by a comparatively slight push, has not been agreed upon.

Identifying the trigger is one beginning for penetrating further back into the mystery. On suspected trigger, is the microseism which has come to light recently, with the advent of super-sensitive seismographs. Microseisms are tremors that barely move the recording needles. Their causes is not known, but changing weight of the air that accompanies weather changes, is suspected.

Another unproven trigger, is the weight of the ocean tides, sweeping over the continental shelves, which are the comparatively shallow water surrounding continents, as far as 100 miles off shore. Another which might be either trigger or the builder of the house of cards, is the possibility of the tides in "solid" earth. Harlan P. Heston, director of Perkins Observatory, at Delaware, Ohio, who, spring, advanced arguments that these earth tides actually exist.

Class S. Colborn, now called in for the United States Senate, in Michigan, holds that the well-known wobble of the earth's poles, with the consequent tilting of the continents, and of the earth's shape, accounts for the unbalancing. The theory of tectonics, is widely held, is the possibility of the earth's crust, instead of being a uniformly solid cover, is made up of sections of all sorts of sizes and weights that must balance against each other, with almost fluid movements. "Athletically" are another hypothesis. They are sections where melted rocks, 30 to 60 miles below the surface, thrust upward heat and cause that cause both volcanoes and earthquakes.

The melting of rocks is held to come from extra pressure or an unbalanced earth crust above them. An astronaut might grow anywhere.

## A Canadian Playground

Sylvan Region Of Great Beauty Is Found In Northern Saskatchewan

North of the great fertile belt devoted to agriculture there lies in the province of Saskatchewan, Canada, a region of rocks, woods, and water which seems almost to have been formed by nature as a special playground for man. Here are found thousands of crystal lakes. White birch, jack pine, and white spruce grow here to small and large sizes. Pickering, pine, and gray trout are plentiful in the lakes and streams, while moose, deer, bear and many species of game birds abound. The typical example of this region is Prince Albert National Park. It was set aside in 1905 and is an important addition to Canada's already fine system of national reservations.

**Business Men's Tour To Orient**  
More than thirty representatives from all parts of Canada have been made with the Canadian Chamber of Commerce for the business men's tour to the Orient this fall, leaving Vancouver on October 15th. R. McMillan, of Vancouver, chairman of the excursion, states that he expects an additional fifty representatives will be made before sailing day.

The high cost of living wouldn't be much a problem if the luxuries of yesterday had not become the necessities of today.

## Mostly Kleptomaniacs

Found That Shoplifters Rarely Steal Because They Are In Need

Shoplifters do not steal because they are in need but because they are kleptomaniacs, it is held. This statement was made by the head of the indoor detective squad of Toronto's largest department store. The question was raised and answered as a slight in connection with the unusual number of shoplifting cases that have figured in the press during the past few weeks.

The vast majority of cases that come up, The Mail and Empire's informant declared, it is found that the people who steal are in no way in need of the things they steal. They do it usually because of some idiosyncrasy of make-up.

In fact, so unusual is it to find people stealing because of necessity that recently, when a woman was caught who had been stealing from the store in order to feed her family, the manager, after she had confessed, cleared the matter up with the police and sent her a shipment of groceries.

For some reason never yet explained, women are far more addicted to shoplifting than men. They figure, in fact, in almost 90 per cent of all cases that come to the attention of the store authorities.

Shoplifting is not confined to any one class of society. It is almost as common amongst the wealthy as the poor, amongst the upper levels of society as of the lower.

"We've had some amazing cases to prove this point," the detective head declared. "We have one professor's wife in our 'rogue gallery' who steals repeatedly and is repeatedly caught. I don't know if you know who it was. We always put her in her husband, and he makes things right. The woman always treats the matter lightly and doesn't seem to be worried in the least when she gets caught."

The attitude of the store towards those caught stealing is surprisingly mild. "We prosecute very few cases," the detective declared, "usually only those who deny their guilt. In most cases, we just let them go. Where the detective's case is, however, we really had characters, however, we lay charges against them."

## Counterfeit Bank Notes

Spurious Bank Of Nova Scotia Ten Dollars Being Circulated

Counterfeit Bank of Nova Scotia ten-dollar bills are being circulated in Canada, according to a warning issued by the post department. The spurious money is described as follows:

"The counterfeit is a photographic copy of the front of the genuine note issued of January 2nd, 1929, serial letter 'A'. In appearance it is darker and is slightly blurred. The back is of the 1924 issue but of a deeper blue, and is quite blurred. The numbers, which are crudely engraved, are about the same height but wider, and the figure 2008, on one counterfeit, poorly presented take up slightly more space than on the genuine bill. In size, one of the spurious notes is the same as the genuine, but another is slightly larger. The paper is rather greasy and has a shiny finish."

## Politics Are Precarious

Ten Years More Than The Average Length Of Tenure For Parliamentarians

Politics, apparently, is the most precarious and short-lived of all professions. Every two decades Parliament renews itself, and thus, incredible as it may seem, there will not be a half-dozen men in the new Parliament who sat in the same House in 1918. Of the 1911 more than 400 men have entered Parliament, struted the stage for a brief time, and then passed to oblivion. Ten years, or two sessions of the House, is more than the average length of life for the ordinary parliamentarian. — Ottawa Journal.

## Tourists Travel By Air

As the first of the flying touring parties planned in Europe, this year, 20 planes with amateur pilots, recently started from England. Their first stop was at Frankfurt, Germany, where they spent a day in sightseeing, and in attending a banquet at the local sports club. They next visited Friedrichshafen, and afterwards stopped at many other European cities.

## Western Canada Coal

With the exception of true anthracite, practically every kind of coal is to be found in Alberta and British Columbia. The high grade lignite and sub-bituminous coals of Alberta are designated by the provincial name of domestic, or bituminous, to differentiate them from the ordinary lignite.

## Conserving Wild Life

American Game Protective Association Will Tag Deer To Study Habits

Science is being applied in various ways on the battle line to conserve and restore wild life. The latest innovation proposed is that of "tagging" deer, to try to learn more of their life history, ranging and feeding habits, and altogether, to determine their ideal environment, according to reports reaching the American Game Protective Association, New York.

Tagging of fish, ducks, upland game birds, and even song birds, has been in operation for some years and much valuable data compiled which is being made use of to help create ideal conditions for the various species. For instance, the life history of different kinds of ducks is being learned rapidly, by their flight lines established, their favorite foods determined, and other valuable facts learned as they are ascertained. As a consequence, ideal refuges and sanctuaries are being established along the flight lines.

Now comes the deer, to be put under the microscope of exacting science. The conservation department of Michigan is tagging a number of wild fawns, as rapidly as they can be caught. The location of tagging is carefully noted. When a tagged deer is taken later, comparisons with the original data will be made.

Suppose the deer is taken three years later, several hundred miles away from where it was originally tagged. "Why?" science immediately asks, and then proceeds to find the answer. And within this answer will be valuable information if you know what can be made use of in creating better conditions in the wild for this species.

The study will continue over a course of years, and it is expected, by tagging every state that has wild deer will make similar studies of their native species.

## Hoboes Off Lock Train

Penitentiaries Out Of Flag When Conductors Collect Fares

In these days of unemployment it is nothing to see half a dozen hoboes men jump a freight on the fly in order to make the next town and possibly a job, but the climax was reached on the Hudson Bay Railway a few days ago when two foreigners got into a box car for the ride into the Island that the "people's road" was made solely for their benefit.

The mixed train was running south from Churchill, while it was flagged by two men at a small station. When the train stopped the men jumped in between two box cars for the ride into The Pas. The conductor gave the "new Canadians" a lesson in Canadian procedure. He walked down the train, ordered the men out from between the cars, and sent them back to the day coach. When they were released, he collected their fares and the train proceeded.

## Sweets For Livestock

Melasses In Grain Mixtures Found To Be Unprofitable

Feeding experiments at the University of Minnesota's College of Agriculture, tend to show it doesn't matter to a calf's sweet tooth. Using melasses in grain mixtures fed to calves, it was found they appeared to relish the food, but, no greater gains in weight than regular diets — without the expense of sweets.

Urban and suburban railways of Berlin carried 445,000,000 passengers last year.

Lindbergh went better if wined occasionally.

## Mapping The Seas

Work Proceeds In Matter Of Correct Charting Of The Ocean Of The World

A new director is being elected to the international Hydrographic Bureau, at Monaco. This institution was founded after the war to enable the sea magicians throughout the world to work on deeper lines; it is to be kept responsible for the correct charting of the ocean of the world. Now that experts added by the world's scientific instruments are able to map the seas with certainty, we must not forget the pioneer charters of old who braved countless dangers on their voyages across unknown oceans.

Christopher Columbus is the most famous of these brave adventurers who made voyages of such momentous discovery, and another great sailor-explorer was Vasco da Gama, who doubled the Cape of Good Hope. Ferdinand Magellan, the Portuguese navigator, who first sailed into the Pacific Ocean through the straits of Malacca and the Spice Islands, was also among the great explorers, although his achievements in daring and sea-exploration are of the greatest importance.

Disputed was his treatment at the Portuguese Court, he took service with Spain, and after a voyage to Malacca and the Spice Islands, he decided to try to discover a western route to these islands.

It set out on a small fleet, and eventually in 1520 made a stormy passage through the Straits of Magellan, the first attempt to enter the Pacific Ocean. He named the new-found ocean thus because of its calm when he first sailed upon it.

Magellan sailed on and reached the Philippines, but in 1521 he was killed in an attack with natives. His fleet, however, continued their voyage, and after rounding the Cape of Good Hope, sailed back to Spain, a tremendous discovery of having sailed round the world.

## Will Study Eclipse

Scientists Will Endeavor To Ascertain Effect Of Sun On India

Important scientific results may follow the observations of the total eclipse which will be visible at Nainital, familiarly known as "The Peak," New Zealand, this month. In view of tracing a complete observation of the eclipse, the New Zealanders have borrowed instruments from England. One line of work in connection with the eclipse will be carried out by the New Zealand Radio Research Committee, which has arranged for observation on the transmission of radio signals across and along the path of the eclipse — observations which may throw light on some of the interesting problems of radio reception.

## Definition Of Gentleman

It Is Not A Matter Of Birth But Of What He Is

Here is the definition of a gentleman, by one of the leading experts of his generation. You meet the man, and the only words you hear expect. A gentleman is a gentleman no matter what he is. It is not in the face of the man, but what is in his mind. A man does what is right in any walk of life, sport or otherwise, then that man is a good man — and a gentleman. Lord Louisa, the veteran sporting peer, gave the above definition in response to the toast of his health, at a luncheon given at his house at Pontefract, Glamorgan, recently.

A curved sheet of cardboard is used instead of a mounds to reproduce the tones of a Swedish inventor's phonograph.

## Homesteads Still Available

Millions Of Acres In Prairie Provinces Yet To Be Disposed Of

Fear that the homestead policy under which certain public lands are granted free to settlers who will live upon and improve them might be discontinued is set at rest, temporarily at any rate. With the recent transfer of Canadian public lands in the provinces of Manitoba, Saskatchewan, Alberta and British Columbia to the administration of the provinces, the question arose whether the free homestead policy would be continued. Information has been given that in at least the greater part of the area affected, the free homestead policy will be continued for the time being, although the possibility of future changes exist. This possibility is said to have effected a speeding-up of homestead entries at the present time.

Since the purchase of the territorial rights of the Hudson's Bay Company, in Western Canada, by the Canadian Government, in 1870, the practice of granting farm lands free to settlers who would develop them has been followed. Homestead entry No. 1 was made in 1872, just 58 years ago. The area under homestead entry now exceeds 58,000,000 acres. A homestead consists of 160 acres, and may be made by any person who is the sole head of a family and any male who has attained the age of 21 years and is a British subject or declares his intention to become one. An entry fee of \$10 is charged and several residences and improvements must be completed within a certain time to the land is issued.

A recent compilation places the area of land surveyed but not yet disposed of in Manitoba at 3,000,000 acres, Saskatchewan, 3,000,000, and Alberta, 1,675,000 acres. More homestead entries are made by Canadians than by any other nationality, and many of the Americans, and next by English.

## Warning To Hunters

Charlessmen Takes Annual Toll Of Many Lives

"Take the bunch out of hunting, and game is lost," is the warning never shooting at movement of "society." Charles Avery, president of the American Game Protective Association, says in urging hunters the country over, to co-operate with state game officials, and conservation groups, who have recently inaugurated educational campaign to stop the needless killing and wounding of many species of game.

"Wind-blown tree limbs or bushes and movements of fellow hunters, or any other cause, often cause optical illusions for the unwary," Mr. Avery said.

"With the 1930 hunting season for many game bird and animal species about to open, every hunter can do his part, to stop the loss of human life."

"The careful hunter always holds the muzzle of a loaded gun down or in a position over his right shoulder when walking, but his gun comes into play only when he is sure of his target, and before they get into camp at night, he never aims at anyone, you never can tell what might happen."

## Luxuries For Eskimos

Hudson Bay Trading Schooner Carries Ice Cream Preserver To Far North

The Eskimo of Canada's far north have become ice cream connoisseurs, and when the schooner "Old Maid No. 2," picturesque trading schooner of the Hudson's Bay Company's fleet, left Vancouver for the Western Arctic recently, she carried what is believed to be the first ice cream freezer to pass through Hebridean Straits.

Wile blubber must have lost its luster among the hardy natives of the barren lands, for cases of peanut butter, fruit salad, grape juice, canned grapefruit, hot sauce, jams and vegetables found a place in the assortment cargo. All sorts of candies were also included in the cargo, and, according to the skipper, most of the sweet goods are for Christmas presents. The territory visited by the trading vessel is reached from the outside world but once a year.

Large shipments of fence wire, to be used for newly established sheep farms, were also included in the cargo. There was even a parcel marked "city hat" which could considerable speculation.

## Princess Gives First Aid

Princess Giovanna, the King of Italy's 22-year-old daughter, has been trained well by the Red Cross, as she learned to administer first aid. Recently, thrown from her horse, she was lying bleeding in the road when the princess came upon him in her motor car. She stopped, and she wound and had her chauffeur exceed the speed limit in reaching a hospital.

## The London Of Dickens

Little Town Around Old Nooks and Corners Of That Famous Novelist Known

Any ardent member of a Dickens Fellowship will not be surprised to make an itinerary all his own. He may be eager to behold Westminster Palace, or to see the "little town" where he was born. He may look forward to exploring the Tower of London, but he will be as anxious to wander in Temple Church where Ruth Pinch used to meet John Westlock. The late F. C. Wade, Agent-General for British Columbia, spent many an hour in taking Canadian members of the Dickens Fellowship round old nooks and corners of London rendered memorable by the great writer. Fred Wade was a Dickensian of independent idea, and his conclusions on Dickens lore and topography did not always coincide with what may be called the authorized version. This is not saying, though, that Wade must necessarily have been wrong.

There must be a veritable Dickens "fan" to appreciate the new edition of "The London of Dickens," by Walter Dyer, published by Cecil Curzon, in fifteen chapters, covering a tour which it would occupy two hours to visit. The author includes in his tour the houses mentioned in Dickens' works. He also includes references to every house in which Dickens ever resided.

London has altered immeasurably, of course, since the days of Dickens, and even if some of the buildings which he described are still in existence their surroundings are nearly all entirely different. "Take St. Martin's Church, Trafalgar Square, for instance, on the steps of which David Copperfield sat, the old St. Martin's, after a long search for Little Emile, after he stands nowadays on these steps and surveys the broad scene before them it is little hard to realize that in Mr. Peggotty's time there was neither a Trafalgar Square nor a Nelson Monument."

Just around the corner of the Strand the old finds today the Golden Cross Hotel. "All these things," says the author, "which the Pickwickians set out with 'Jingle,' declared the ardent, but uncertain, tourist, the Golden Cross of Pickwick Papers, where also David Copperfield laid his head when David Copperfield set him on holiday, stood on the spot where the Nelson Monument now is."

Readers will recall no doubt "in allusion by David Copperfield to the taking an early morning swim in an old Roman bath, which existed just off the Strand." "It may be true," remarked David, parenthetically. "Yes, and it is still there — a century or more after Copperfield's time — and it is still being used largely as Copperfield used it, and as it was used by young Romans when the Crucifixion was a comparatively recent event."

Mr. Dexter's book serves not merely as a constructive work, but as a Dickens-land in London; it makes a most attractive supplement to any other Dickens guide. The author, in general. Unlike some Dickensians, the author for the most part resists the temptation to identify places which reached their peak of popularity never existed except in the novelist's imagination. Mr. Dexter acknowledges his indebtedness to previous workers in the same field. They all must have walked and worked with compasses, for not only have they exhausted the regular byways, but they seem to have sought out every little back-alley which ever could have existed in Dickens' day. It is easy to believe that the task to them was a fascinating one.

## First Apples Exported

The first apples exported from Nova Scotia are said to have been sent to Liverpool in 1840, the price realized being 22 cents per barrel. In 1854, a shipment of 700 barrels was made by schooner to Boston, U.S.A., the price realized being \$2.75 per barrel.

A good English waiter is said to be the least servant in the world.

## "You are a quarter of an hour late, Mister."

"I fell down the stairs . . ."

"That that does not put it a quarter of an hour — it takes a quarter of an hour to get up."

## "You can go swim?"

"Yes, can you swim?"

"Oh, nothing — but I just thought of it." — Karitavara, Oslo.

DOMINION GREENHOUSE

AND PRODUCE CO.

Now that badminton is becoming a popular indoor winter sport it has been suggested that a club be formed here. As a suitable building is the big problem it has been suggested that the local militia use the armory for that purpose.

Tom Mignault of the P. Campaneau & Son Staff, was taken suddenly ill last Thursday and was removed to the hospital where it was found he was suffering from appendicitis. An operation was performed and now Tom is progressing favorably.

## BULL'S EYE

It is the intention of "C" Co. at S. A. R. to hold a series of rifle shoots in the Armories, Broadway commencing Wednesday, Oct. 8th at 7:30 p. m. All members of the Militia and ex-service men are entitled to take part. Information regarding matches, targets, etc. will be announced at this shoot. Other information may be obtained from Musketry officer, Lieut. W. J. Evans or any officer or N. C. O. of "C" Company.

Officers and men are anxious to make this a success and will appreciate the co-operation of civilians who may make arrangements to take part.

from obscurity to world fame is the record of Japan within the past fifty years, says Dr. Naomichi Kano, Tokyo University professor and chairman of the Japanese National Committee on world power congress, here on a tour of Canada and the United States and a passenger aboard the Empress of Asia. He attributed the growth of his country to her progress in engineering.

The British Bowling team which played 15 matches in Los Angeles in the last two months, losing five and winning eleven of the games, sailed for England aboard the Duchess of York recently. They came out to win the American Bowling Trophy, but the five games lost were in that event, and they must wait next year for another attempt.
